Student Achievement data:

Given that YLHS is a new school, obtaining reliable CST scores has proven difficult. All of our students' achievement data must come from our District Office, which has made every attempt to provide us with the information we need. However, 88 students at YLHS came to us from outside of the District, and we do not have assessment data for those students. The following CST scores are based on the latest, most accurate data available to us.

It is also important to note that these test scores are based on students' performance at other schools. They do not reflect an assessment of student achievement during their time at YLHS. However, this info provides a baseline for our stakeholders to begin to identify our Critical Academic Needs.
